

# **Industries Served**

Serving a wide spectrum of industries, we provide engineered components across forging, casting, sheet metal, plastic, and rubber.

## **1. Agriculture**

We supply components such as forged shafts, cast housings, sheet metal brackets, plastic covers, and rubber seals for agricultural equipment.

## **2. Earth Moving & Heavy Equipment**

Providing forged axles and pins, cast housings, heavy sheet metal structures, plastic components, and rubber bushes for heavy-duty machinery.

## **3. Automotive**

Manufacturing forged gears and shafts, cast engine and transmission parts, sheet metal brackets and mounts, plastic trims, and rubber seals.

## **4. Railways**

Delivering forged coupler components, cast brackets and housings, sheet metal panels, plastic interiors, and rubber gaskets for railway systems.

## **5. Off-Highway**

Supplying forged shafts and pins, cast components, sheet metal fabrications, plastic parts, and rubber dampers for off-highway vehicles.

## **6. Construction**

Offering forged joints and pins, cast housings, sheet metal frames, plastic components, and rubber mounts for construction equipment.

## **7. Wind Energy**

Providing forged shafts, cast hubs, sheet metal enclosures, plastic components, and rubber sealing solutions for wind energy systems.

## **8. Marine**

Supplying forged shafts, cast valves and housings, sheet metal structures, plastic components, and rubber seals for marine applications.

## **9. Aerospace**

Delivering precision forged parts, cast components, sheet metal structures, high-performance plastic parts, and rubber seals for aerospace applications.

## **10. Industrial Machineries**

Manufacturing forged shafts and gears, cast machine components, sheet metal enclosures, plastic parts, and rubber components for industrial machinery.
